

ASSIGNMENT-1

Jasmithi Karri
11-07-2026

1. Get all customers whose first name starts with 'J' and who are active.

The screenshot shows a database query interface with a SQL query editor at the top and a results grid below. The query is:

```
1 use sakila;
2 select * from customer
3 where first_name LIKE 'J%' and active = 1;
```

The results grid displays a list of customers with the following columns: customer_id, store_id, first_name, last_name, email, address_id, active, create_date, and last_update. The results are filtered to show only active customers whose first name starts with 'J'.

The output section shows the execution of the query, indicating that 63 rows were returned.

2. Find all films where the title contains the word 'ACTION' or the description contains 'WAR'.

The screenshot shows a database query interface with a SQL query editor at the top and a results grid below. The query is:

```
1 USE sakila;
2 select title, description from film
3 where title like '%ACTION%' or description like '%WAR%';
```

The results grid displays a list of films with the following columns: title and description. The results are filtered to show only films whose title contains the word 'ACTION' or whose description contains the word 'WAR'.

title	description
ATTRACTION NEWTON	A Astounding Panorama of a Composer And a Frisbee who must Reach a Husband in Ancient Japan
ENTRAPMENT SATISFACTION	A Thoughtful Panorama of a Hunter And a Teacher who must Reach a Mad Cow in a U-Boat
SATISFACTION CONFIDENTIAL	A Laddish Yarn of a Dentist And a Butler who must Meet a Secret Agent in Ancient China
TEMPLE ATTRACTION	A Action-Packed Saga of a Forensic Psychologist And a Woman who must Battle a Womanizer in Soviet Georgia

The output section shows the execution of the query, indicating that 4 rows were returned.

3. List all customers whose last name is not 'SMITH' and whose first name ends with 'a'.

ASSIGNMENT-1

Jasmithi Karri

11-07-2026

14. Show all customers along with the total number of rentals they have made, ordered from most to least rentals.

The screenshot shows a SQL query editor with a toolbar at the top. The query is as follows:

```
1 use sakila;
2 select c.customer_id, c.first_name, c.last_name, count(r.rental_id) from customer c
3 left join rental r on
4 c.customer_id=r.customer_id
5 group by c.customer_id, c.first_name, c.last_name
6 order by count(r.rental_id) desc
```

Below the query editor, the 'Result Grid' is displayed, showing the results of the query. The grid has columns for customer_id, first_name, last_name, and count(r.rental_id). The results are ordered by the count of rentals in descending order.

customer_id	first_name	last_name	count(r.rental_id)
